

Download QuickTime 7.7.9 for Windows

Languages English

Download

Important: QuickTime 7 for Windows is no longer supported by Apple. New versions of Windows since 2009 have included support for the key media formats, such as H.264 and AAC, that QuickTime 7 enabled. All current Windows web browsers support video without the need for browser plug-ins. If you no longer need QuickTime 7 on your PC, follow the instructions for uninstalling QuickTime 7 for Windows.

What's New in QuickTime 7.7.9

QuickTime 7.7.9 contains security updates and is recommended for all QuickTime 7 users on Windows. For information on the security content of this update, please visit this website: <http://support.apple.com/kb/HT201222>.

The QuickTime web browser plug-in is no longer installed by default and is removed if you have a previous version of QuickTime on your PC. If you still need this legacy plug-in, you can add it back using the custom setup option in the installer.

QuickTime 7 is for use with Windows Vista or Windows 7. If installed on other versions of Windows, it may not offer full functionality.

Notice to QuickTime 6 Pro users

Installing QuickTime 7 or later will disable the QuickTime Pro functionality in prior versions of QuickTime, such as QuickTime 6. If you are a QuickTime 6 Pro user, see this article: <http://support.apple.com/kb/HT201691#compatibility> before proceeding with this installation.
